### **DETAILED ACTION**

In the 08/02/2010 Final Office Action, claims 1-14 were pending. Claims 1-3 and 7-9 were rejected, and claims 4-6 and 10-14 were objected to. In the 09/01/2011 Remarks and Amendments, claims 1 and 11 were amended, and claims 2 and 12 were canceled. Claims 1, 3-11, and 13 remain pending.

### **Request for Continued Examination**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/01/2011 has been entered.

### **Information Disclosure Statement**

The information disclosure statement (IDS) submitted 09/01/2011 was properly filed in compliance with 37 CFR 1.97 and considered.

### **Remarks and Amendments**

Claims 1-3 and 7-9 remained rejected under 35 USC 103(a) as obvious over WO 03/000698, published 01/03/2003. Applicant amended claim 1 by narrowing the definition of X to  $^{125}\text{I}$  or a tritium containing ethyl group ( $\text{X}=\text{C}_2\text{H}_3\text{T}_2$ ). The '698

Art Unit: 1626

publication does not teach or suggest  $^{125}\text{I}$  or a tritium containing ethyl group ( $\text{X}=\text{C}_2\text{H}_3\text{T}_2$ ).

Instead, it discloses a radiolabeled compound having an methoxy substituent at the equivalent of X, as well as a general suggestion that certain of the compounds disclosed are useful for radioisotope labeled ligands for identification of transporter proteins. The '698 publication presents one example of a compound with a radiolabel at

the X-position. However, this example, , does not speak to the substituents at the X position recited in Applicant's claims, i.e.,  $^{125}\text{I}$  or a tritium containing ethyl group ( $\text{X}=\text{C}_2\text{H}_3\text{T}_2$ ). The '698 publication makes no suggestion to

modify  to produce Applicant's claimed compounds.

This rejection is therefore withdrawn.

Claim 3 was rejected as obvious over the compound disclosed by the

'698 publication at Scheme 2, . Claim 3 includes Y as an organometallic group, and with regard to Y, pp. 10 and 11 of the specification state,

In the case where Y is an organometallic group, examples thereof include tin, thallium, mercury, silicon, aluminum and boron. Examples of an organic substituent on the metal include lower straight alkyl groups, acetyl group and trifluoroacetyl group (Baldwin R. M., Appl. Radiat. Isot. 37, 817-821, 1986).

In response, Applicant argued that an organometallic group, by definition, cannot include silicon, since silicon is not a metal. However, as indicated in the specification, when Y is an organometallic group, examples thereof include silicon. Thus, Applicant's argument is not persuasive. Notwithstanding Applicant's argument, the rejection is withdrawn. The compound in the '698 publication's Scheme 2,

, depicts Y as *t*-butyldimethylsilyloxy, which fails to define an "organometallic group" because of the oxygen. In order to meet Applicant's "organometallic group" limitation, the silicon in *t*-butyldimethylsilyl would need to be bonded directly to the benzoyl, rather than bonded through oxygen. The '698 publication's compound utilizes *t*-butyldimethylsilyloxy as an alcohol protecting group. Accordingly, the 698 publication does not suggest a modification to the compound in Scheme 2 that would result in any of Applicant's compounds recited in claim 3. This rejection is withdrawn.

Since all rejections are withdrawn, the objections to claims 4-6 and 10-14 are also withdrawn. There are no outstanding rejections over or objections to the pending claims.

**Conclusion**

Claims 1, 3-11, and 13 are ALLOWED.
